

SECURITY MINDSET WHEN WORKING REMOTELY

Private workspace

Where possible, set up a private workspace and use workplace approved devices

Cyber scams

Expect an increase of cyber scams via social media as ads and malicious news articles. For more information about cyber scams go the Scamwatch website.

Official COVID-19 guidance

Review recent Australian Government's Stay Smart Online COVID-19 guidance for practical ways to keep yourself and your family safe online.

Don't give out information

You will never receive an email, SMS or phone call from the government asking you to verify your user ID or password.

Call for help!

You do not need to be technical support! Don't try to resolve technical issues yourself - that could lead to greater risks. Instead call the help desk or your ICT team. They are there to help!
