

Client Risk Assessment

Improving quality of life and safety of people you support

Would you like to refresh your risk assessment skills? Or learn the steps to take?

This practical course will step you through how to complete a risk assessment to enable effective risk management planning to meet Quality Standards and support client choice

Course outcomes

Part 1: eLearning - self-paced online module

Duration: 45 minutes

- Be aware of Quality Standard requirements and best practice for risk assessment
- Know how to identify risk and the steps to take complete and document a risk assessment
- Find out how causes are found and what types of controls (risk management) strategies to look for
- Discover how to analyse risk and determine the likelihood and severity of the risk to help with risk rating
- Understand the decisions that need to be made after an assessment to achieve effective risk management

Part 2: Instructor Led Training (ILT) via Zoom

Duration: 1.5 hour

Prerequisite: Completed Part 1 eLearning module

- Gain a recommended Risk Assessment Template
- Reflect on how to identify risk and when to do a risk assessment
- Participate in Case study practice and receive instructor feedback on completing and documenting a risk assessment
- Question and answers on risk rating and risk management decision-making

Who should attend:

- Coordinators, nurses, team leaders in Aged and Disability services
